Corporate perspective Debt vs Equity

- Company is being started
or
- New project is being considered
- Original owner wants to take some cash out

- So, when the Company needs financing

© Anna Chmielewska, SGH 2016

Equity vs. Debt

- Equity – financing (in form of money or in-kind contribution) that Company's owners invest into the venture.
 - Equity investors become the Company's (co-) owners. Ownership unit is called 'share'. The equity investors are entitled to share in profits.
- Debt – financing that creditors are willing to give the Company, and the Company is obliged to return in the future.

© Anna Chmielewska, SGH 2016

Equity vs. Debt

If you are Company's owner and need more resources for new venture, you can:

- Take debt and repay it with interest, but each Company has limited **DEBT CAPACITY**
- Issue shares (to increase Company's capital)

© Anna Chmielewska, SGH 2016

Benefits and risks of share issue

- Company can usually raise more capital by issuing shares than it can borrow
- Additional capital increased debt capacity of the Company
- Share issue does not require the Company to pay periodic interest or make repayments
- Necessity to share ownership with new investors
- New investors may have influence on the Company's operations

Private equity or public equity?

- Know the co-investor
- Choose the co-investors
- Pre-agreed shareholders agreement
- Better protection of sensitive information
- Lower costs
- Typically lower price
- Access to broad investor base
- Publicity/ Prestige
- Stock exchange rules apply
- Access to capital in the future
- Limited influence on the choice of investors
- High costs but higher proceeds
- Motivation for employees
- Market Valuation

© Anna Chmielewska, SGH 2016

Private equity

Each transaction can be unique

© Anna Chmielewska, SGH 2016

Private equity

- **Shareholders Agreement** – legal agreement between the shareholders that rules the co-operation between the Shareholders
- **Corporate and Civil Codes** – legal acts that set some limits to what can be agreed and rules in case sth is unregulated in the Shareholders Agreement
- Everything that is not strictly enforced by the Law can be agreed in the Shareholders Agreement

© Anna Chmielewska, SGH 2016

Shareholders Agreement

– main areas of decisions

- Core business / Strategy of the Company and majority needed to change it
- Management and its appointment
- Supervisory Board composition
- Scope of decisions made at Shareholders and Supervisory Board Meetings (and majority needed)
- Anti dilution – decisions on capital increases
- EXIT (especially for the minority investors)

© Anna Chmielewska, SGH 2016

Exit

– special provisions

- Put option
- Call option
- Right of First Refusal
- Drag-along rights
- Tag-along rights

Types of PE transactions

LBO	leveraged buyout – can be any of the following
MBO	management buyout – the existing management of the company buy the company
MBI	management buy-in – incoming management buy the company
BIMBO	combination buyout and buy-in
IBO	institutional buyout – a PE company buys the company and then puts in the management of its choice
P to P	public to private (i.e. delisting)
Leveraged build up (Buy & Build)	The PE company makes an investment in order to buy a lot more companies in that sector and put them together to make something big and profitable

The private equity deal process

© Anna Chmielewska, SGH 2016

Contrasting a buyout with an acquisition

	PE acquirer	Corporate acquirer
Use of a Newco	Newco must be created to hold the shares	Target can be taken as a subsidiary of the acquirer
Impact of debt	Acquisition debt is held in the Newco and does not gear up the PE fund	Debt relating to the acquisition is not ring-fenced and affects the acquirer's capital structure
Conditional payments	Ratchets can be used change shareholdings, dependent on performance	Earn-outs can be used to give the sellers further proceeds, dependent on performance
Changes to target business operations	Part of the acquisition plan agreed with management	Generally plans for synergies to be created
Management incentives	Linked completely to the eventual exit from the investment	Will depend on the corporate objectives
Purpose and timescale of acquisition	The acquisition is made with an ultimate profitable disposal in mind	Probably made for strategic reasons with no expectation of selling on
Funding the acquisition	A relatively high level of debt	To meet the corporate financial structure
